To whom it may concern:

I support the effort to allow naturopathic doctors in the state of Connecticut prescription authority because I believe naturopathic medicine is an important part on a person healing process. By allowing naturopathic doctors this authority , they can better combine both treatment for the benefit of the patient. I and my family and many people I know have greatly benefited from this healing modality for many years.

Please support this bill.

Thank you,

Cordially,

*Carmen Rodríguez*
